

National Program of Cancer Registries (NPCR) REGISTRY PLUS ONLINE HELP

Registry Plus Software for Cancer Registries

Cancer Registries
Registry Plus™ Software

Brief Description

Registry Plus Online Help (RPOH) is an integrated user-friendly online help system for Windows, incorporating standard abstracting and coding documents from cancer registry standard setters. SEER manuals, Collaborative Staging documentation, the ACoS Commission on Cancer FORDS Manual, the NAACCR data dictionary, and ICD-O-3 are hyper-linked and cross-indexed. The application can stand alone or be integrated as context-sensitive help into other applications. For many purposes, RPOH is a convenient substitute for bulky paper manuals. RPOH is embedded in Registry Plus applications, but is also available as a free-standing program from the Registry Plus Web site.

Updates

- This version of Online Help was designed to automatically upgrade older application versions while preserving configuration settings
- RPOH has been adopted by major software vendors as an add-on to their products
- The current version of Online Help includes an improved collection of standard coding manuals, cross-referenced, indexed, and context-linked to minimize the need for reference to printed manuals during abstracting
- Improved overall usability of the current online help system

Future Plans

- NAACCR Version 11 documentation will be incorporated into application
- The SEER manual from 2004 will be incorporated into application
- Other documents, such as the NAACCR EDITS Metafile documentation, are being considered for inclusion
- A professional usability application evaluation will be done, and the user interface will be enhanced to maximize usability
